MKV SHUROO - BLACK
SHUROO

NOW IN BLACK!!

ShuRoO is an electronic device emitting high frequency sound and was designed as an early warning alert for kangaroos and other wildlife. ShuRoO is not designed to scare or panic animals. It has been described as a "police siren" for kangaroos to alert of an approaching vehicle. This is because the sound emitted continually ramps up and down through a range of frequencies that alert and disturb wild animals. It is a sound that is not normal in their natural environment.

LED STRIP CAMPING LIGHT
QVLEDCL & QVLEDCLYL

\$45ea
for 2 or more

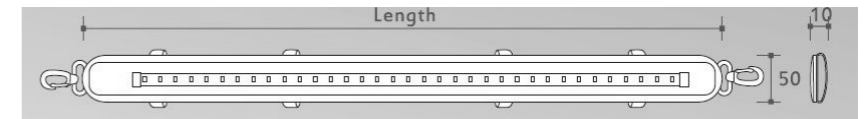

Compact carry bag

QVEE

The QVLEDCL & QVLEDCLYL are 1200mm in length and the lumen rating is a massive 1300LM at 14W. This unique light has a touch pad dimmer switch to dim the light when 1300LM isn't required. The QVLEDCLYL illuminates a yellow light designed to keep annoying insects away

QVLEDCL - White illumination
QVLEDCLYL - Yellow illumination

- Can be dimmed from 10%-100%
- 5m lead with cigarette plug
- Extension lead supplied with cigarette socket & battery clips to connect direct to battery if required
- Mounting hooks at each end and velcro loops along backing for universal installation
- Easily folded for compact storage
- IP65 Rated
- 12V

QVEE 3:1 RATIO HEATSHRINK

QVEE

EXCLUSIVE TO QVEE

In addition to QVEE's heatshrink range is the new 3:1 shrink ratio single wall heatshrink. Single wall is normally 2:1 ratio. Great for workshops or the ute with the easy to use dispenser box. Reduces wastage and helps keep the workshop tidy.

SUPER COMPACT UHF CB RADIO WITH LCD SOUNDPATH™ SPEAKER MIC TX3350

The TX3350 is an 80 channel, feature packed super compact UHF CB radio with the new SoundPath™ full function LCD Speaker Microphone.

The challenge was to create a unique solution that allowed a full function LCD Microphone that could house a built in speaker with clear audio all within a compact and ergonomic design. SoundPath™ diverts the audio through a unique convex path around the microphone bollard, whilst maintaining the compact size.

The TX3350 combines the unique combination of space saving benefits of a super compact size radio and full function speaker microphone all in the palm of your hand. The radio can now be discretely installed in almost any location within a vehicle and without the need for extension speakers.

UHF CB TWO WAY RADIO POWERED BY DIGITAL SIGNAL PROCESSING FOR PURE SOUND TX3550S

Bringing together all of GME's unique technology, including ScanSuite™; the latest in digital scanning technology; the TX3550S is the flagship of the S series family.

It comes with the MC634B fully functional LCD remote controller microphone with SoundPath™ speaker, full spectrum backlighting, tactile buttons and an ergonomic design for comfortable extended use. The microphone attaches to the front of the unit for obstruction free use and is the ultimate 'space saver'.

The radio comes with 95 user programmable receive frequencies to listen in on local emergency services to keep safe and stay in touch. Other features include SelCall, CTCSS, DCS and Voice Inversion Scrambler for those users looking for greater privacy and less interruption.

Australian made GME radios now have a 5 year Warranty.
